

Savya Sanchi Sharma

Software Engineer – Full Stack (React | Next.js | Node.js)

SUMMARY

Software Engineer with 4+ years of hands-on experience building web applications using React, Next.js, Node.js, and GraphQL, with a strong focus on problem-solving and practical engineering trade-offs. Experienced in designing frontend and backend features that balance speed, maintainability, and business needs. Quick learner with exposure to Java and Python, and a strong belief that code exists to solve real customer and business problems, not over-engineer solutions.

TECHNICAL SKILLS

- **Frontend:** React.js, Next.js JavaScript (ES6+), TypeScript HTML5, CSS3, Responsive UI Component-Based Architecture.
- **Backend:** Node.js, Express.js GraphQL APIs REST APIs Java (Foundational) Python (Foundational)
- **Databases:** MongoDB PostgreSQL Data Modeling & Query Optimization
- **Architecture & Problem Solving:** Pragmatic System Design Trade-off Analysis (Speed vs Maintainability) Avoiding Premature Over-Engineering Business-Oriented Engineering Decisions.
- **Tools & Practices:** Git, GitHub Agile / Scrum Debugging & Troubleshooting Rapid Learning of New Tools & Languages

WORK EXPERIENCE

Senior Consultant – Full Stack

Aaseya IT Services (June 2021 – Present)

- Actively contributed to frontend and backend coding using React, Next.js, Node.js, and GraphQL APIs.
- Designed and implemented features with a focus on simplicity, scalability, and business impact.
- Solved complex technical challenges through analytical problem-solving and structured debugging.
- Evaluated design and coding decisions to avoid premature over-engineering while ensuring long-term maintainability.
- Integrated MongoDB and PostgreSQL for different use cases, making informed trade-offs based on performance and data needs.
- Collaborated closely with cross-functional teams, clearly communicating technical ideas and trade-offs.
- Quickly adapted to new tools, frameworks, and requirements as project needs evolved.

Software Engineer

Tiot Systems Pvt Ltd (Jan 2020 – May 2021)

- Built web application features using React and JavaScript, contributing to end-to-end UI development.
- Worked on backend integrations using Node.js APIs and handled data persistence with MongoDB.
- Participated in full lifecycle development including design, implementation, debugging, and production support.
- Strengthened problem-solving skills by analyzing bugs, identifying root causes, and implementing reliable fixes. Gained exposure to Java and Python-based services, understanding how frontend and backend systems interact.
- Collaborated with team members using Agile practices and clear technical communication.

PROJECTS

MoneyStack | Next.js, Node.js, GraphQL, PostgreSQL

Built a full-stack finance application using Next.js and Node.js, exposing data through GraphQL APIs. Designed schemas thoughtfully to balance development speed and future scalability. Used PostgreSQL for transactional data and focused on clean, maintainable code.

Matchifyy | React, Node.js, MongoDB

Developed a matching platform with React frontend and Node.js backend. Implemented MongoDB for flexible data modeling and optimized queries based on real usage patterns. Focused on solving user problems efficiently rather than over-engineering early solutions.

EDUCATION

Bachelor of Engineering

Institution: Bhilai Institute of Technology, Durg
Electronics and communications 2015 -19
